Comparative Market Analysis

4148 S Zeus Dr, West Valley City, UT 84128 (Apollo Hills #1)

Parcel 20-02-103-002 | MLS #2000800 (prior sale) | Prepared August 16, 2026

DATA-SUPPORTED VALUE RANGE

$425,000 – $465,000

Best estimate: **$445,000** (~$238/sqft)

Property last sold for $415,000 in July 2024. Since then, West Valley's market has genuinely appreciated (+1.1%/yr per the regression model, with the most recent 90 days trending even higher), and the property gained real capital improvements — solar (Aug 2024) and HVAC/water heater upgrades (Sept 2024). This range reconciles four independent methods: adjusted comparable sales, the regression model, public AVMs, and the recent-sold trend.

CONSERVATIVE	BEST ESTIMATE	OPTIMISTIC
$425,000	**$445,000**	**$465,000**
Near adjusted-comp median	Blends model, comps, market trend, upgrades	Near recent-sold trend / high AVM

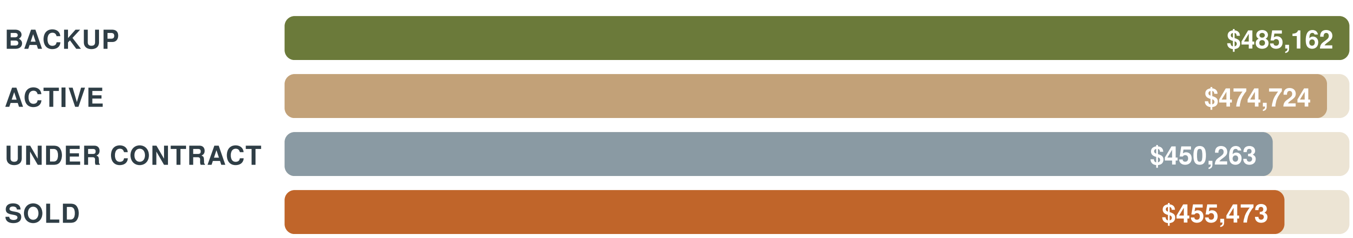
RECENT SOLD TREND — IS THE MARKET MOVING?

WINDOW	COMPS	AVG	MEDIAN
Last 90 days	118	$461,010	$467,750
Last 180 days	256	$465,287	$465,500
Full comp pool (~2 yrs)	830	$455,473	$454,000

- **Unlike a flat or softening market, West Valley is trending up** — median sold price has moved from $454,000 (full pool) to $467,750 (last 90 days).
- The CMA regression model's own fitted trend agrees: **+1.1%/year**, controlling for size/age/features — this is already baked into every adjustment rate shown below, not a separate guess.
- This appreciation, on top of two real capital improvements (solar, HVAC/water heater) since the July 2024 sale, is the core reason this property is worth meaningfully more than its $415,000 sale price.

> *Computed directly from the West Valley Market Update pipeline's Data tab, filtered to site-built single-family homes within ±35% of subject square footage and ±2 bedrooms.*

MLS SUBJECT RANGE — WEST VALLEY CITY SITE-BUILT SFH



- **Sold avg $455,473 (median $454,000, n=830)** — the proven anchor, though the Recent Sold Trend above shows the market has already moved past this blended average.
- **Active avg $474,724 (median $469,990, n=107)** — current competition, priced at a premium to sold, consistent with a rising market.
- **Under Contract avg $450,263 (n=26)** — where deals are agreeing to close, tracking close to the sold anchor.
- **Backup avg $485,162 (n=16)** — committed buyer depth at the top of the range.

SUGGESTED COMPARABLES

#	ADDRESS	SIM	STYLE	PRICE	BD/ BA	SQFT	BUILT	DOM	BSMT FIN	GAR
1	3911 S Kallie Cir	HIGH	Split-Entry/ Bi-Level	$489,550	3/2	1,854	1975	18	100%	2
2	5135 W 4170 S	HIGH	Rambler/ Ranch	$400,000	3/2	1,824	1979	53	25%	2
3	3868 S Marsha Dr	HIGH	Rambler/ Ranch	$457,000	3/2.5	1,888	1976	4	95%	2
4	3947 S 3485 W	HIGH	Split-Entry/ Bi-Level	$478,000	3/2	1,880	1970	13	90%	0
5	6194 W Bona Dea Blvd	MOD	Tri/Multi-Level	$428,000	3/2	1,834	1984	2	80%	2
6	3432 W Brett Ave	MOD	Split-Entry/ Bi-Level	$450,000	3/2	1,894	1970	92	100%	3
7	4253 S 6180 W	MOD	Tri/Multi-Level	$403,000	3/2	1,833	1984	47	100%	1
8	6709 W 3860 S	MOD	Split-Entry/ Bi-Level	$407,000	3/1.75	1,888	1970	44	100%	1

Notable: *most close comps have a garage (1–3 bays) and higher basement finish (80–100%) than the subject's carport-only parking and 70% finish — real, quantifiable gaps the model already accounts for (garage +$10,172/bay), not reasons to discount further beyond what's already priced in below.*

ADJUSTED COMPARABLE SALES — WHAT EACH COMP REALLY MEANS FOR THIS HOME

ADDRESS	SOLD PRICE	ADJUSTED TO SUBJECT	NOTE
3911 S Kallie Cir	$489,550	$444,032	Walkout basement, 2-car garage
3868 S Marsha Dr	$457,000	$424,972	2-car garage, larger main floor
3947 S 3485 W	$478,000	$484,367	No garage — closest match to subject
3432 W Brett Ave	$450,000	$415,719	Walkout, 3-car garage
6709 W 3860 S	$407,000	$404,913	1-car garage, fewer full baths
5135 W 4170 S	$400,000	$347,618	3 full baths, 2-car garage — notably more equipped than subject

> *Each adjustment applies this market's own per-feature rates (main floor $/sqft, basement finish, garage, acreage, age, baths) to reconcile that comp toward the subject's exact specs — not just its raw sold price.* ***Median of these six: $420,346.*** *Two additional comps (6194 W Bona Dea Blvd, 4253 S 6180 W) were excluded from this table — both have a genuine upper floor, a structurally different layout from the subject's single-level main+basement design, making a direct linear adjustment less reliable.*

ACTIVE COMPETITION — WHAT ELSE BUYERS ARE CONSIDERING

MLS#	ADDRESS	STYLE	LIST PRICE	MODEL ESTIMATE	VS. LIST
2133850	6614 W King Valley Dr	Rambler/Ranch	$412,000	$449,088	**+9.0%**
2175077	6828 W Copperhill Dr	Split-Entry/Bi-Level	$514,900	$429,523	**–16.6%**
2171121	4382 W Cortney Dr	Split-Entry/Bi-Level	$525,000	$443,452	**–15.5%**

> *"Model Estimate" and "vs. List" come directly from the West Valley pipeline's own monthly Listing Estimates — the same regression model used throughout this report, applied to every current active listing automatically, not just the subject.* ***Two of these three competing listings are priced 15–17% above what the market data supports*** *— real context for how the subject compares to what buyers are actually choosing between right now.*

IF WALKOUT BASEMENT
$455,226 (+$14,249 flat premium — basement listed as "Entrance" type, walkout status unconfirmed)

FORMULA
$196,779 base + 936 sqft AG × $119 + 655 sqft fin. bsmt × $100 + 281 sqft unf. bsmt × $76 + 0.18 ac × $255,298

> *This model already has the market's +1.1%/yr appreciation trend fit directly into every rate — it's not a separate adjustment layered on top. The estimate range ($440,977–$455,226) sits close to the Best Estimate above and is consistent with the Gemini research's own high-end range ($455K–$470K).*

MULTI-SOURCE VALUATION SNAPSHOT

MLS SOLD COMPS	QUANTARIUM AVM	REDFIN ESTIMATE	COTALITY AVM
$455,473	**$430,238**	**$424,385**	**$465,200**
★★★	★	★	★
Primary · n=830	Reference	Reference	Reference — highest AVM

> ***What's an AVM?*** *An Automated Valuation Model — a computer-generated estimate (like Zillow's Zestimate) based on public data, not an actual walkthrough of the home. Public AVMs (avg ≈$438K) sit below the MLS sold anchor and the regression model here — consistent with AVMs typically lagging a rising market and not fully crediting the solar/HVAC upgrades. Utah is a non-disclosure state, which further limits AVM accuracy.*

LISTING FLAGS

No garage — carport only. Most close comps have 1–3 car garages. At this market's own rate (+ $10,172/bay), this is a real, quantifiable gap versus a typical comp — already reflected in the pricing above, but worth confirming buyers understand upfront rather than discovering it as a surprise.

Solar installation (Aug 2024). Confirm whether the system is owned outright or financed/leased — this materially changes how it should be marketed and whether it's a net value-add or a pass-through obligation for the buyer.

Confirm basement type. Listed as "Entrance" rather than a clear walkout/daylight designation — worth confirming at showing, since it moves the regression estimate by roughly $14,000.

Effective year built (2006) vs. actual (1979). A meaningful gap suggesting a substantial past renovation — worth highlighting specifics in marketing if documented (what was updated, when).

SELLER SUMMARY

- **The market is moving in your favor.** West Valley is appreciating — the regression model shows +1.1%/year, and the most recent 90 days of sales are trending even higher than that trend alone would suggest ($467,750 median vs. $454,000 for the full 2-year comp pool). This isn't a stale market; it's actively moving up.
- **You've added real value since your purchase.** The solar installation (Aug 2024) and HVAC/water heater upgrades (Sept 2024) are genuine capital improvements, not just maintenance — buyers are paying for these, not just avoiding future costs.
- **One honest gap to know about: no garage.** The carport-only parking is a real, quantifiable difference from nearly every close comp, which have 1–3 car garages. At this market's own rate (~$10,172/bay), that's already priced into the range below — best to be upfront about it rather than have it surface as a negotiating surprise later.
- **The comp-by-comp math backs this up.** Adjusting six close sold comps to your exact specs (see table above) lands at a median of $420,346 — and two of your three closest active competitors are priced 15–17% above what the data actually supports, meaning your home, priced right, will look like the stronger deal by comparison.
- **Recommendation: list at $445,000–$459,900.** This reflects the appreciation trend, your upgrades, and where the adjusted comps and regression model both land — with room to negotiate toward $445,000 if needed while still capturing the market's upward movement since your 2024 purchase.
